

Field Name	Description
rank	Popularity rank based on combination of Majestic Millions and Open PageRank Initiative lists of "top" domains. Also the table primary key.
URL	URL of home page. This URL may not be the final home page URL if the one listed redirects.
TLD	Top level domain
totalerrors	Total number of WAVE errors identified (sum of error items below)
totalelements	Total number of page elements/DOM nodes present in the page
errordensity	totalerrors / totalelements
totalalerts	Total number of WAVE alerts identified (sum of alert items below)
accessrank	Rank of page (from 1 to 1000000) of page based on weightings of totalerrors, errordensity, totalalerts, and a sum of WAVE feature items below.
newaccessrank	For Million2 only. The updated accessrank for August.
wcagfail	Boolean = 1 if any WAVE error items were present, thus page fails WCAG.
wcagimgfail	Boolean = 1 if alt_area_missing, alt_input_missing, alt_link_missing, alt_map_missing, alt_missing, or alt_spacer_missing > 0. Indicates a WCAG image failure.
contrast	Number of WAVE Contrast failures
alt_area_missing through title_invalid	Number of WAVE Error items as documented at http://wave.webaim.org/api/docs?format=html
accesskey through text_justified	Number of WAVE Alert items as documented at http://wave.webaim.org/api/docs?format=html
alt through longdesc	Number of WAVE Feature items as documented at http://wave.webaim.org/api/docs?format=html
totalaria	Sum of aria, aria_label, aria_search, and aria_tabindex. IMPORTANT: This field wasn't calculated for Million2 (the August re-analysis)
aria through html5_video_audio	Number of WAVE HTML5 and ARIA items as documented at http://wave.webaim.org/api/docs?format=html
dl through ul	Number of WAVE Structural Elements items as documented at http://wave.webaim.org/api/docs?format=html
<i>All remaining items</i>	Boolean = 1 if the technology was detected
